Wireframes Batch 1

Institute for New Economic Thinking, Version 4

NOVEMBER 17, 2014

<u>Contact Us</u> <u>Media Inquiries</u> <u>Get Updates</u> <u>Privacy Policy</u> <u>Terms of Use</u>

1 Utility Navigation

Also now includes link to "Get Updates" (newsletter signup).

2 Main Navigation

- **2.1** Active section ("About")
- 3 Explore by Navigation
- **Secondary Navigation**

Localization Tools

cms INET will be able to enter translations of pages (or even specific fields on a page) in the CMS. For example, if INET entered a Chinese version of this page, there would be a button to view the page in Chinese. Clicking that link would load the Chineselocalized page at a separate URL.

6 Introduction to the Institute

Active and straightforward introduction to describe the Institute.

6.1 Link to Mission [0.1.1]

7 What the Institute Does

Bold statements demonstrate the Institute is hard at work and quickly qualify what's being produced. These statements also link across the site without requiring the user to rely on traditional navigation paths: Research Papers [0.2.1], Grants [0.3.1.], Events [0.4.3], Young Scholars [0.4.2], and Education [0.5].

8 Featured Experts

Elevating the topical experts associated with the Institute helps legitimize the organization and pushes users closer to specific work being produced.

cms The individuals shown are sample content—five (5) randomly selected individuals with a "Notable" profile on the site.

- **8.1** Crosslink to individual Notable Profiles [0.4.1.1]
- **8.2** Crosslink to Experts [0.4.1]
- 8.3 Link to Leadership & Staff [0.1.2]

9 Newsletter Signup Call-to-Action

Prompts those who only visit this page (and may not return frequently) to receive updates on newly added content.

10 Featured Course or Event

Prioritized for timeliness to coordinate with marketing initiatives. Alternate event module shown on right.

cms Manually add one (not both).

11 Promotion of Research Programs

11.1 Crosslink to Research Programs [0.3.2]

12 Promotion of Partnerships

12.1 Link to Partnerships [0.1.3]

13 Ideas & Papers Content

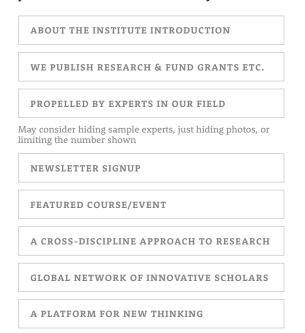

Surfaces the most recent blog articles, videos, and papers from a very active section of the website. This is a jump-off from the Institute to the work it produces, but deprioritized because most users will navigate through a different path (e.g. main navigation, external link) and this content is not necessarily representational of INET's stances on issues.

13.1 Crosslink to Ideas & Papers [0.2]

14 Footer Navigation

SOURCE ORDER DIAGRAM

This diagram shows the sequential order of content from the top of the page to the bottom, and thereby implies the intended content hierarchy across screen sizes.

Partnership Detail [0.1.3.1]

A: General Styles Partnership

1 Active State in Navigation

Signifies that the user is in the Partnerships section, but not on the landing page.

2 Social Sharing Tools

We recommend using a service like AddThis to support this. It keeps sharing up to date with each of many services (pulling that maintenance off INET's plate and speeding our development) and it also provide statistics. Several layout options, e.g.

3 Region/Country

CMS If a content type is affiliated with a Country, do not show the parent Region as a badge. If a content type is only affiliated with a Region (no Country), show the Region badge.

4 Individuals Connected to This Partnership

5 Papers Related to this Partnership

CMS Pulls in all research papers from the partnership. Only show if a partnership has papers.

6 Related to this Partnership

cms Pulls in any Events, Research Programs, or Courses that are affiliated with the Partnership (no limit).

Ideas & Papers [0.2]

E: Ideas & Papers

1 Introduction to the Ideas & Papers Section

2 Featured Interviews

Highlights fresh, multimedia thinking and promotes those involved in the field of economics.

cms Automatically pulls in the most recent interview.

2.1 Link to Interviews & Talks [0.2.2]

3 Featured Collection

Editorial collections can add a level of specificity and control beyond existing relationships and Topics/Themes in the system. They enable INET to adapt to popular news stories and curate responses.

cms Should always show one (1) collection with short description and sample item. This collection can be manually featured. Need to decide whether the sample item is manually selected or most recent. In creating content, INET should make sure more than one collection is available at launch.

- 3.1 Link to Editorial Collection Detail [0.2.3.1]
- 3.2 External link to INET's Facebook page

4 Promoted Facebook Conversation

cms Manually-entered text and link to thread

5 Promotion of Research Papers

While this page may not be the primary path for users looking for a specific paper title (i.e. site search), this module helps direct those looking for papers to the right place. It's deprioritized compared to Interviews and Collections, because papers are not published as regularly and have a more limited audience.

CMS The paper is chosen manually for this page, with a manually entered excerpt.

6 Featured Work on a Topic or Country

cms Topic/Country would be selected manually. Topic features one (1) random expert who can be associated with a topic, and two (2) most recent Papers or Articles. Country features three (3) most recent Papers or Articles (view right).

7 Recent Articles on the Blog

Similar to Papers, this will not be the primary path for users who access the Blog—most will rely on secondary navigation or follow a direct link (e.g. on Facebook) to an article. Still, this module serves up a feed of regularly published Blog content.

cms Three (3) most recent articles.

Paper Detail [0.2.1.1]

1 Topic/Region/Country

cms Show only Topics (not parent Themes). If a content type is affiliated with a Country, do not show the parent Region as a badge. If a content type is only affiliated with a Region (no Country), show the Region badge.

2 HTML Full Text Accordion (Text Shows on Page)

cms Only display if full text is available for the Paper.

3 Paper Type and Authors

4 Metadata

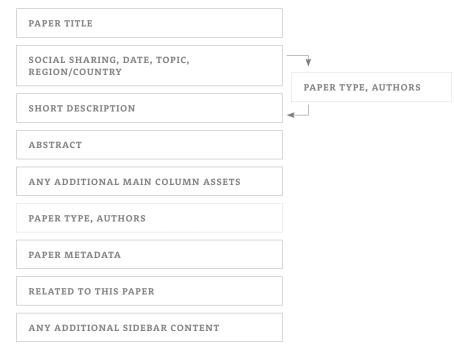

CMS Includes file download, external source (open field), Ning discussion URL (open field), and JEL classification. All optional.

4.1 Crosslink to Archive, filtered by JEL code

5 Related to this Paper

cms Pulls in any Conference Sessions, Research Programs, or Grants that are affiliated with the Paper (no limit).
